- **Bachelor of Technology, UKFCET, Kerala, India**   **2023**
  Computer Science and Engineering - 3 Backlogs (currently enrolled to clear)

- **Mayyanad HSS, Mayyanad, Kerala, India**   **2019**
  HSE in Bioscience

Certifications:
- Certificate of Excellence for successfully getting first place in Arduino Robotics Workshop – 2021
- Certificate of Completion for Successfully completing the Flutter Internship – 2023 Logiprompt Techno Solutions
- Certificate of Completion for Successfully completing the Python-Django Project – 2022 Trinity Technologies

Skills:
Programming languages	**:** Dart, Python
Web programming	**:** HTML, CSS, JavaScript(Js), Bootstrap, AOS;
Open source frameworks	**:** Flutter, NodeJs, ReactJs, Django;
Database programming	**:** MongoDB(NoSQL), MySQL, Firebase;
Development environments	**:** Microsoft Visual Studio;
Tools	**:** PostMan, Git, GitHub;
OS	**:** MS Windows 10/11, Linux

Work Experience:
November 2023 – October 2024	**Company: Logiprompt Techno Solutions Pvt Ltd**
	Role: Academic Project Associate
July 2023 – October 2023	**Company: Logiprompt Techno Solutions Pvt Ltd**
	Role: Software Trainee Flutter

Projects

November 2023 –January 2024   **Project Title: E-Waste**

Description:
- Created a website for Waste Management system which helps users to request for waste collection and tracking. The website featured admin panel, user dashboard and waste collector dashboard.

Responsibilities:
- Worked with a robust team of developers and Project Manager in a agile environment.
- Developing the necessary design for the web, creating wireframes and using DJANGO as the web framework.
- Heavily participating in aspects including coding(Django, Python) and designing(PhotoShop).

Environment: Python, DJANGO, XAMPP server.

April 2024 –September 2024   Project Title: E-Matrix
Description:
● Developed a web application for Digital Marketing with an added E-Commerce platform built in.
Responsibilities:
● Working with a team of developers, and Project Coordinator in an agile environment.
● Developing the necessary design for the web, creating wireframes and using MERN stack as the web technology.
● Heavily participating in aspects including coding(MERN, javascript) and designing(PhotoShop,).
Environment: React, MongoDB, Git, Express.

April 2024 –September 2024   Project Title: DonorHub
Description:
● Developed a web application for Online Crowd Funding platform with a added feature for monetary and non-monetary donations. The site provides facilities for Users to donate clothes and track their status.
Responsibilities:
● Worked with a robust team of developers and Project Manager in a agile environment.
● Developing the necessary design for the web, creating wireframes and using MERN stack as the web technology.
● Heavily participating in aspects including coding(MERN, javascript) and designing(PhotoShop).
Environment: React, MongoDB, Git, Express.

April 2024 –July 2024   Project Title: Quick Buy
Description:
● Developed an Online Mobile application for local dress shops to showcase their collections and inventories and allowing users to select the dresses from their local shops.
Responsibilities:
● Worked with a robust team of developers and Project Manager in a agile environment.
● Developing the necessary design for the Mobile app, creating wireframes and building the app using Flutter and laravel framework.
● Heavily participating in aspects including coding(Dart, Php) and designing(PhotoShop).
Environment: Flutter, Dart, Git, Laravel, Php.

April 2024 –September 2024   Project Title: Sports X
Description:
● Developed an online turf booking web app with added features incorporating social media, tournaments and E-Commerce. The site offers an all in one stop for sports enthusiasts.
Responsibilities:
● Developing the necessary design for the web, ensuring client requirements were met and developing the code for the site.
● Heavily participating in aspects including coding(React, Laravel) and designing(PhotoShop).
Environment: React, Laravel, Git.

April 2024 –September 2024   Project Title: Service Discovery Platform
Description:
● Created a website for an all in one stop for services for the users ranging from household to commercial. The site features Service Provider dashboards and booking facilities.
Responsibilities:
● Worked with a robust team of developers and Project Manager in a agile environment.
● Developing the necessary design for the web, creating wireframes and using MERN stack as the web technology.
● Heavily participating in aspects including coding(MERN, javascript) and designing(PhotoShop).
Environment: MongoDB, Express, React, Nodejs .
